

FRV Cabinet

Suv's and trucks have proven to be effective and economical response vehicles for command and EMS operations, but their biggest weakness is equipment management. With the FRV (First Responder Vehicle) cabinet system, responders gear is easily accessible when they need it, easily cleaned, and easy to see when its missing.

This system is made for first responders, by first responders. Endlessly customizable, this system is yours.

FRV cabinets are made from HDPE and stainless hardware, so they can be cleaned with a powerwasher, or decontaminated with bleach.
